

# Autumn's Return

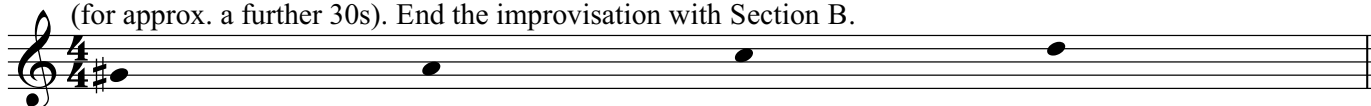

Michaela Cornelius

## A

Improvise on these notes. Seek to create a calm, yet mysterious atmosphere.

Give the melody you create room to breathe.

After improvising on these notes (for approx. 30s), incorporate these notes in different octaves (for approx. a further 30s). End the improvisation with Section B.

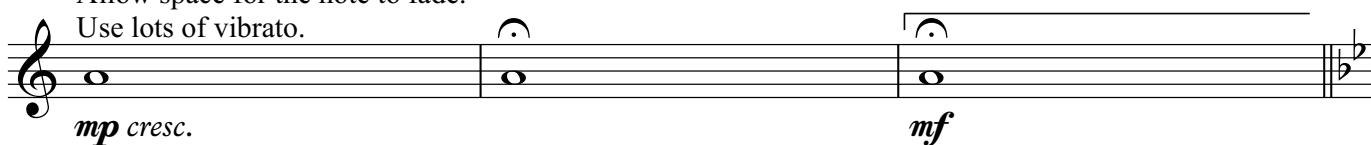

## B

Gradually slowing down, start at c. ♩=50

Allow space for the note to fade.

Use lots of vibrato.

## C

As light and graceful as leaves falling c. ♩=55

## D

Livelier c. ♩=65

Improvise rhythms on these chords. Play each chord for the duration of one bar.

**poco rit.** . . . . .
